OMAR BOUATTOUR

AI & DATA ENGINEERING STUDENT

Sfax, Tunisia ● +216 54 866 800 ● omar.bouattour.03@gmail.com
linkedin.com/in/bouattour-omar ● github.com/OmarBouat

Profile

Final-year Computer Science Engineering student specializing in AI and Data Engineering. Experienced in LLM inference, AI agents, Kubernetes, and full-stack development. Seeking a 6-month end-of-studies internship starting February 2027.

Technical Skills

Programming: Python, C/C++, Java, JavaScript/TypeScript, SQL/PLSQL
AI & LLM: PyTorch, TensorFlow, Scikit-learn, vLLM, LangChain, LangGraph, LiteLLM, AI Agents
Cloud & DevOps: Kubernetes, Docker, Ansible, Git, CI/CD, Prometheus, Grafana
Data & Backend: Flask, SQLAlchemy, Spark, Hadoop, Airflow, IoTDB, Redis, PostgreSQL

Education

Engineering Degree in Computer Science **09/2024 – Present**
Faculty of Sciences of Sfax, University of Sfax, Tunisia
Integrated Preparatory Cycle in Computer Science **09/2022 – 06/2024**
Faculty of Sciences of Sfax, University of Sfax, Tunisia

Professional Experience

AI & Full-Stack Engineer (Freelance) | UTA Metaux **09/2026 – 10/2026**

- Designed and developed a full-stack business management platform using Flask, SQLAlchemy, and JavaScript, automating client management, product catalogs, and technical and financial quotations.
- Engineered an autonomous AI agent using Qwen, LangChain, and LangGraph, enabling natural-language interactions, automated business operations, quotation generation, and interactive data visualization.

AI / LLM Infrastructure Intern | Data Engineering and Semantics Unit, FSS **06/2026 – 08/2026**

- Deployed GPU-based LLM inference services using vLLM and Kubernetes, exposing OpenAI-compatible APIs for Qwen and GPT models.
- Optimized and evaluated inference using Tensor/Pipeline Parallelism, Prefix Caching, and Multi-LoRA across GPU configurations.
- Benchmarked TTFT, TPOT, latency, throughput, concurrency, and KV-cache utilization under varying workloads.
- Built Prometheus/Grafana monitoring and integrated LiteLLM Gateway, Open WebUI, and local coding agents.

Data Engineering Intern | Data Engineering and Semantics Unit, FSS **06/2025 – 08/2025**

- Developed a real-time IoT telemetry platform using Python, MQTT, Redis, and Apache IoTDB.
- Deployed data services using PostgreSQL, Docker, and Kubernetes.

Full-Stack Development Intern | ArtiDev **07/2024 – 08/2024**

- Developed web applications with ReactJS, .NET, and SQL Server in an Agile environment.

Selected Projects

LLM Serving Platform | vLLM, LiteLLM, Kubernetes **2026**

- Built a Kubernetes-based inference platform serving Qwen models through OpenAI-compatible APIs with centralized routing and monitoring.
- Evaluated inference optimization techniques and monitored TTFT, throughput, latency, and KV-cache utilization using Grafana.

Kubernetes Infrastructure & CI/CD | Ansible, Gitea, Nexus

- Built a reproducible 4-node Kubernetes cluster and automated deployments through an end-to-end CI/CD pipeline.

Vegetable Image Classification | TensorFlow, Keras

- Trained MobileNetV2, ResNet50, and CNN models for 36 categories, achieving 97% classification accuracy.

Crop Recommendation System | Scikit-learn, Flask

- Developed and deployed an ML recommendation system using soil and climate data with multiple classification algorithms.

Leadership & Achievements

Competitive Programming Club, FSS: Mentor (2025–Present), Lead (2024–2025), HR Manager (2023–2024).
Competitive Programming: Codeforces Specialist, Tunisia Rank #60; 30th TCPC 2024; 1st Hello World 6.0.
Hackathons: 1st Technova 1.0 & Fit-Tech 1.0; 2nd MasterFaster 2.0; 3rd I2I 1.0 & TRC 2.0.

Certifications & Languages

Certifications: IBM Data Engineering Foundations; Computer Vision Fundamentals (Google Cloud).
Languages: Arabic (Native), English, French.
